

PILARIX FORTE 35

cream

PILARIX FORTE 35 IS DEEPLY MOISTURISING AND EXFOLIATING UREA CREAM WITH HIGH CONTENT OF UREA (35%), WHICH IN COMBINATION WITH 2% OF ACYLIC ACID AND 3% OF ACETIC ACID SOFTENS ROUGH AND EXCESSIVELY EXFOLIATING EPIDERMIS. THE PRESENCE OF PANTHENOL, SHEA BUTTER AND ALLANTOINE SUPPORTS REGENERATION PROCESSES AND PROTECTS SKIN FROM DRYNESS BY INCREASING MOISTURISING AND SOFTENING OF STRATUM CORNEUM.

Information about the product. Read all of this leaflet carefully before the use.

INDICATIONS FOR USE:

- Softening and exfoliating effect for excessively rough and dry skin of elbows, knees, heels.
- Strong perifollicular keratinisation
- Strong skin callus
- Chronic dryness and hardness of the skin

UNIQUE FORMULA:

UREA - natural chemical substance produces by human body as a metabolite of proteins and other nitrogen compounds. It does not have any hygroscopic properties, but modifies chemical structure of proteins by covering water bindings, thereby increasing its content in stratum corneum.

SALICYLIC ACID - exfoliates by loosening intercellular connections, removes unnecessary layers of stratum corneum. It encourages healing processes of bumps and irritations and regulates cellular renewal of the skin.

LACTIC ACID - belongs to the group of alpha-hydroxyl acids (aha). Occurs naturally in human body, is non-toxic and completely safe. Lactic acid works gently, does not irritate skin, is safe to use and very effective at the same time. It has exfoliating properties, causing weakening of the corneocytes' adhesion, which results in removal of keratinocytes.

SHEA BUTTER - thanks to high content of unsaturated fatty acids is a natural uv filter with an anti-inflammatory, antibacterial, anti-aging effects. It accelerates scarring of wounds and burns.

PANTHENOL - is a natural ingredient in the skin, necessary for its proper formation. Reduces water loss

through the epidermis and effectively moisturises skin. It has healing and regenerating effects thanks to stimulation of cellular divisions.

ALLANTOINE - a urea derivative with soothing, anti-inflammatory and regenerating effects. It stimulates cell division and thus encourages renewal and healing of damaged epidermis.

DIRECTIONS:

Apply twice a day or as directed by doctor or pharmacist on dry and cleaned skin.

SIDE EFFECTS:

Itching, erythema, edema of skin or hypodermis oedema. If any of the symptoms occur, immediately discontinue use and contact a doctor.

CONTRAINDICATIONS:

Hypersensitivity to cream ingredients, especially to salicylates, age under 3 years old Do not use on damaged skin, mucous membranes, urogenital areas, eyes and skin around eyes. Do not use if bacterial, viral or fungal skin infections occur.

RECOMMENDATIONS AND PRECAUTIONS:

For external use only. If swallowed, immediately contact a doctor. Keep out of the reach of children. Do not use after the expiry date stated on the package.

Store in a dry place at room temperature (15°C - 25°C) in a tightly closed container.

AVAILABLE PACKAGING:

50 ml bottle.
Once opened, use within 6 months.
